

Cosmur

Constructing partnerships since 1973

Who We Are

At Cosmur, we have achieved a reputation for putting people at the heart of everything we do. Investment in staff training ensures we can always find solutions to meet our client's aspirations, and by focusing on tenants and communities we know our work will really make a difference.

Our vision is to continue as leaders in our field. The key to this is to exceed our clients' expectations by adding value every step of the way, from concept to delivery. We treat every project as unique, and believe in developing collaborative working relationships with our clients to deliver a successful outcome.

Our business is built on the quality and experience of our people. We have some of the best talent, brightest minds, and leading expertise within our organisation. Cosmurs' Directors are accomplished in the industry and adopt a hands-on approach to every project to guarantee the highest standards.

As an Associate Member of the Considerate Constructors Scheme, we are committed to improving the image of the industry. We register all of our qualifying sites with the scheme and ensure we comply with all aspects of the scheme's 'Code of Considerate Practise'. More information about the scheme can be found on their website, www.ccscheme.org.uk

Private Residential

Our highly trained workforce and selected Supply Chain Partners enable us to successfully carry out the highest quality residential projects, ranging from new build houses to the refurbishment of single flats in some of London's smartest addresses.

For over 40 years now we have been helping home owners and designers achieve their aspirations for their properties. This unrivalled experience allows us to manage quality into every aspect of the building process.

Commercial

Cosmur has considerable experience in building working environments which are designed to inspire staff, act as an expression of a company's values, and make an impact on communities.

Our construction professionals apply equal care to achieving maximum value and quality for our clients, whether the project is a Central London art gallery, council offices, or facilities for Premiership football clubs.

Health

Cosmur's user friendly approach means we excel in providing facilities in health and social care services, particularly within occupied premises.

We have carried out works in hospitals, hospices, care homes and rehabilitation centres, with each facility requiring innovative solutions and specialist skills to address the particular challenges of working in such sensitive environments.

We are repeatedly contracted to deliver safe, friendly, durable, and cost-effective buildings and refurbishments, in both the Public and Private sectors.

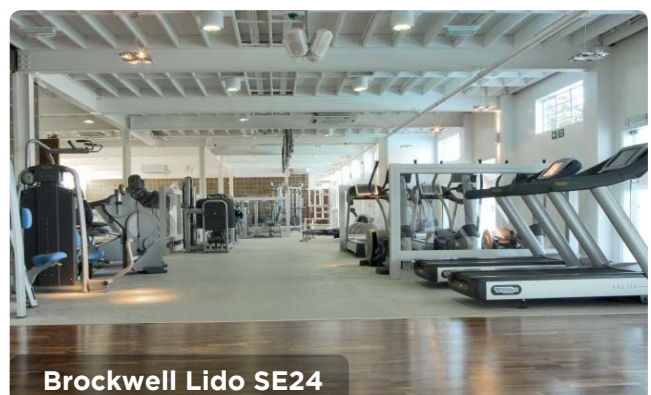

Leisure

Cosmur has been involved in the creation of a number of outstanding recreational and fitness facilities including sports clubs, leisure centres, lidos and stadiums.

As a result of this we have become particularly skilled in creating attractive environments; combining inspirational design for participants with areas for relaxation and socialising. We often find that our experience in this sector allows us to champion ideas and innovations that go further than our clients' expectations.

Education

Cosmur has successfully delivered inspirational learning environments for a wide variety of clients, with projects ranging from Children's Centres to Science Laboratories, and Primary Schools to Universities.

We frequently work with education providers to create safe and transformational spaces, whilst ensuring that all of our projects are completed on time and to budget.

Our experience of working with Schools, Colleges, and Universities in both the Private and Public sectors stretches back over almost four decades.

Social Housing

The refurbishment and renewal of social housing is central to our business and over the last three decades we have established a reputation for successfully managing these complex projects, including entire estate and community regeneration projects.

Our directly employed workforce and long-term partnerships with Suppliers and Sub Contractors ensures that we always bring the right team to any type of housing project from 'Resident in Place' Decent Homes contracts, to new builds on Brownfield sites.

Cosmur's experienced and diverse staff team places us in a better position than most to make every build special and we have a track record of constructing welcoming and cost-efficient homes.

Religion and Conservation

Cosmur's impressive attention to detail makes us the ideal candidate for projects that require unique appreciation of space, light and sound.

We have an in depth understanding of how different Faith Groups operate, as well as the patience and skill required to conserve Grade I and II listed buildings.

Cosmur employs a thoughtful approach towards these aesthetic and delicate projects, with a keen eye for detail and beauty as well as the ability to accurately incorporate the spirit of the building into its structure.
